

206M Armor Plate with Moly-D Duraguard

- Description:** Primrose offers the ultimate in multigrade engine oil performance with Armor Plate with Moly-D Duragard 12 TBN Motor Oil. This 12 TBN, super universal oil is superior to all other engine oils on the market for either gasoline or diesel engines, exceeding CI-4 Plus/SL performance requirements as well as many major engine manufacturers' specifications.
- Composition:** TBN (Total Base Number) is the total detergent/dispersant alkalinity available in an engine oil to neutralize acids. This oil is a 12 TBN formulation. Extensive field tests show superior deposit control to any other oil on the market. The reason for better performance is higher detergent alkalinity. Detergent alkalinity has been directly correlated with reduced ring wear, improved piston cleanliness, reduced bearing wear, improved oil consumption, and better fuel economy. The edge that Primrose enjoys in universal engine oils is both with Moly-D and with Duragard high detergent alkalinity chemistry.
- Performance Characteristics:** The Duragard 12 TBN heavy-duty additive system has been tested for Caterpillar, Cummins, Detroit Diesel, and Mack engines.
- Uses:** 206-M is recommended for use in many gasoline and diesel engines operated in light to heavy-duty service including the severe demands of oil well drilling rig power units. It is particularly recommended for use in super-charged diesel engines burning both low and high sulfur distillate fuels.
- Typical Applications:** Meets and exceeds the following performance requirements:
- | | |
|-------------------------------|-----------|
| API CI-4 Plus/SL | JASO DH-1 |
| Allison Transmission C-4 | ACEA E5 |
| Caterpillar/TO-2 Transmission | CES |
| Cummins | DC 228.3 |
| Detroit Diesel 93K2124 | Scania |
| Mack EO-N Premium Plus | Volvo |
